

OZONE

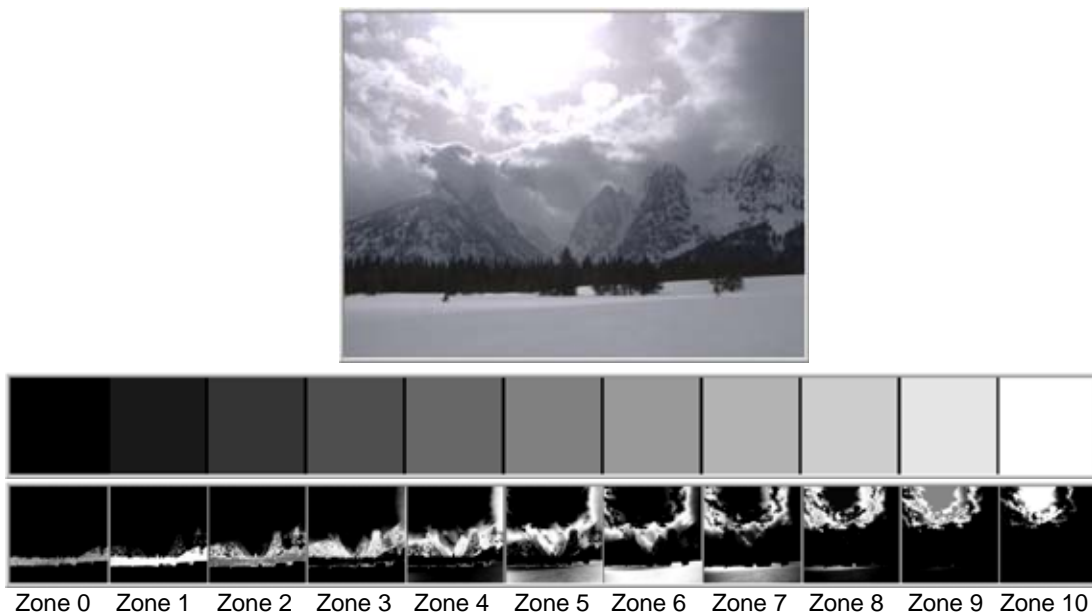

The Digital Zone System

OZONE | Ozone is a unique Photoshop plug-in that allows photographers, designers and artists to manipulate the color of an image with incredible flexibility and accuracy. We like to call it the Digital Zone System.

To create, you must have ideas | To bring your ideas to life, you must have the proper tools...

THE DIGITAL ZONE SYSTEM | Inspired by Ansel Adams' Zone System for still photography, we have created "The Digital Zone System". Just what is the Digital Zone System? The world around us contains an infinite palette of colors, tones and brightness. To reproduce this vast range of brightness, the Digital Zone System takes the spectrum of image values and divides them into 11 discrete zones, using proprietary image slicing algorithms. Each zone is twice as bright as the previous zone, proceeding from black towards white. Look at how the image below is divided into zones:

With Ozone, the color and brightness of each zone can be independently adjusted until you've painted a new picture. All zones can be adjusted and viewed in context and you don't have to commit to the adjustments until all zones are corrected.

OZONE FEATURES | Create zones based on luminance, hue, saturation, red, green, blue, cyan, magenta, and yellow values | Custom zone creation | Brightness, Contrast, Gamma, Red, Green and Blue adjustments for each zone | Operates in RGB Color | 8 or 16 bit per channel processing | Supports Photoshop Actions

Digital Film Tools is an offshoot of Digital FilmWorks, a full service, Los Angeles based visual effects studio | our work includes hundreds of feature films, commercials and television shows | OZONE is the result of many years of visual effects experience which packages many of Digital FilmWorks' in-house, proprietary software tools | tools which photographers, designers and artists won't want to be without

Ozone for Adobe Photoshop 5.5 and above | Adobe Photoshop Elements 2.0 and above | Jasc Paint Shop Pro | Ulead PhotoImpact | Adobe Photoshop Compatible Applications (Windows) | 800x600 minimum screen resolution | Available for download or purchase at WWW.DIGITALFILMTOOLS.COM | Pricing: \$50

Ozone is also available for Adobe After Effects, Avid Editing Systems and Apple Final Cut Pro as part of the 55mm and Composite Suite sets of plug-ins.
